Super Bowl XLI

Indianapolis Colts vs. Chicago Bears

February 4, 2007

Prop #		Odds	Answer
52. Will Indianapolis convert a 4th down attempt?			
Yes		+190/-100	1
No		+100/-250	2
53. Total points scored in the 1st half			
more than	24.5	+110/-100	1
less than	24.5	+100/-130	2

The contest will work as follows. Using the wager sheet, mark on the entry form next to the applicable question number who you think will win each individual proposition. Each proposition has a different payoff. Example: #27 "First Score is a Touchdown" If you wager that the first score is a touchdown, you can you can lose \$160 or win \$100. If you wager the first score is not a touchdo you can lose \$100 or win \$130. For wagers with odds (i.e., 12-1), the payoff depends on the odds. 12-1 on a \$100 bet will lose \$ and win \$1,200. 7-2 odds on a \$100 bet will lose \$100 and Win \$350. Lastly, 1-2 odds will win \$100 and lose \$200.

Each contestant will contribute \$25 and the payoffs will be as always (3rd-\$25, 2nd-\$50, 1st-the rest). Rankings will be based on the net amount won. Every bet is for \$100.

Return the sheets to me by Friday and I'll have everyone's picks on the internet before the game.

Good Luck!
